The Spirit of Achievement makes our students

PROUD WINDERITES!

THE EDUCATORS AT SWS TAKE PRIDE IN CREATING AN ENVIRONMENT WHERE CURIOSITY IS APPRECIATED, QUESTIONS ARE ENCOURAGED AND DIFFERENCES ARE RESPECTED.

From the Principal's Desk

"Too often we underestimate the power of a touch, a smile, a kind word, a listening ear, an honest compliment, or the smallest act of caring, all of which have the potential to turn a life around." ~ Leo Buscaglia

I would like to begin my address by congratulating my dear students, parents and teachers for the wonderful performance in the CBSE Class 10 examination. I am immensely proud to share that a total of 75 students appeared for the exam and each one secured the First Division. Despite all the challenges presented due to the COVID-19 pandemic, their hard work bore fruit.

This year, we also celebrated the 75th Independence Day of our great nation. I hope, that our present and future generations are liberated from the various social evils prevailing in our society such as corruption, gender biased attitude, illiteracy, etc. To tackle these issues, we need to start from the early years of a child and help them obtain an education which will empower them to be empathetic human beings. We need to make our children understand the moral values required for a peaceful and progressive world.

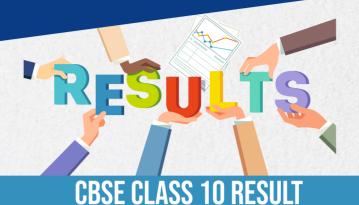

With the intention of supporting the noble cause of uplifting the vulnerable section of the society, we celebrated the 'Joy of Giving' month, wherein our children wholeheartedly donated books, stationery items, toiletries, toys and clothes. We at Smart Wonders believe that values cannot be taught, but are rather imbibed through example. Moreover, kindness creates a ripple effect as our acts don't only affect the people we do nice things for, but many other people who we may never even have come into contact with.

Concluding on a positive note, we had a vibrant and eventful August filled with many competitions and classroom activities where the children got the opportunity to learn, improve their skills and have fun.

I am sending my best wishes to all the students for the upcoming examinations. Prepare well and give it your best shot!

Warm regards Poonamjit Kaur Principal, Smart Wonders School

Smart Wonders School, Mohali, feels immensely proud of its students for giving such an excellent result of Class 10 in the CBSE examination for the session 2020-21. A total of 75 students appeared for the exams, with all securing the first division.

Banipreet Kaur topped the school with 97.8%, followed by Gurmanpreet Singh with 97.4%, Palak and Sukhmani in the third position with 96.8% and Riya with 95.4%.

It is a matter of immense pride and joy for the school that 15 students scored more than 90% marks

Mr Sandeep Singh & Mrs Avinash Kaur (Directors) and Ms Poonamjit Kaur (Principal) congratulated the students as well as the staff for their hard work and dedication, especially during this pandemic.

SPLISH SPLASH ACTIVITY

"Without rain there is no life."~ Jerry Yang

Anyone who thinks that sunshine is pure happiness, has never danced in the rain. Though online classes were being conducted, we could not think of depriving our Wonderites of this pleasure, so a splish-splash activity was organised for the students of Class UKG, 1 and 2.

A special video was played for the children that made them feel as if they are actually walking in the rain. In the comfort of their homes, they were asked to keep their umbrellas open or wear a raincoat for the virtual rain walk.

To explain the formation of rain, the educator shared a video so that the students could understand the water cycle. A rain song was also played on which the students tapped their feet. Towards the end of the activity, they drew a scene of rainy season and expressed their feelings through a myriad of colours.

SPIN A YARN ACTIVITY

"A good story can imbibe the right values in the most impressionable age"

Stories boost the vivid imaginations that run wild in a child's brain. As a learning tool, storytelling can encourage children to explore their unique expressiveness and can heighten a child's ability to communicate their thoughts and feelings in an articulate and lucid manner

To brighten the day with wonderful tales, a 'spin a yarn' activity was conducted for the students of Class 1 and 2 in the last week of July. Students were divided into groups and each group was given a prompt to begin a story. After that, the young vibrant storytellers came forth with wonderful tales.

It was an endeavour to direct our little children towards the creative path. The tiny tots won everyone's heart and were applauded by the educators and the Coordinator of Foundation Years Ms. Manveen.

As part of the ongoing theme "festivals and food", children of Foundation Years prepared healthy tricolor sandwiches for themselves. The students used bread slices, butter, grated carrot, cucumber and green chutney for the sandwich and relished the delicious self-made treats. This activity helped the young chefs in learning how to be self-reliant and also improved their fine motor skills.

IT'S LEARNING NEW THINGS IN LIFE THAT MAKES US GROW.

Fun learning is a holistic approach of education to nurture a passion for learning. Keeping this in mind, the students of Class 2 were introduced to homophones through a creative activity. During their virtual English class, the pupils created innovative homophone flash cards. They memorised the words that are utilised in day-to-day conversations to enhance their vocabulary. The learning engagement gave them hands-on experience to differentiate between a pair of same sound words.

ACTIVITY ON SHAPES

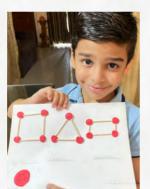

"A STRONG KNOWLEDGE OF SHAPES IS VITAL FOR LEARNING GEOMETRY"

Students of Class 2 took part in an activity on shapes during their mathematics class. The children were excited and had collected the material required for the activity such as ice cream sticks, drawing sheets, clay and toothpicks.

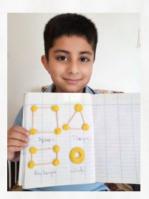

They made different objects like house, animal, robot, etc, using basic shapes from clay. The children made a ball of clay, flattened it and molded it further to give it the desired shape. Students worked with enthusiasm and made beautiful objects using 2-D shapes. The activity proved to be a fun learning experience.

INDEPENDENCE DAY CELEBRATION

The 75th Independence Day was celebrated with great patriotic zeal and fervour at SWS. Students of all classes took part in various activities to pay tributes and remember the freedom fighters who sacrificed their lives for our beautiful nation.

Tiny tots of Foundation Years (Classes UKG- 2) took part in an "Incredible India" activity where they dressed up according to the state allotted to them and recited poems, slogans, quotes of freedom fighters and leaders.

To celebrate the cultural diversity of India, students of Primary Years (Class 3-5) participated in 'Celebrating Indian Culture' event where they chose a state, dressed in traditional attires, presented dances, songs, dishes of that state and talked about its language, culture and festivals.

Students of the Senior Wing (Classes 6-10) presented assemblies on Independence Day. Students showcased their talent by reciting poems, singing patriotic songs, dancing, presenting PPTs on Historical facts of the Independence Struggle and Quiz.

BIOGRAPHY-WRITING ACTIVITY

To enhance the writing skills of Class 3 students, a biography-writing activity was held wherein the students wrote a biography of their mother or father. For the activity, the students interviewed their parents and got the chance to learn more about their life. They jotted down the interesting facts and anecdotes which helped them in writing the biography. The pupils not only improved their writing and creativity skills, but the activity also got them closer to their parents."

INTER-CLASS ENGLISH DECLAMATION COMPETITION CLASS 4, 5

India's Independence Day reminds us all of the sacrifices the freedom fighters made to secure our country's future.

August 15 marks the end of British rule in 1947 and the establishment of free and independent India. It also marks the anniversary of partition of the subcontinent into two countries, India and Pakistan, which occurred at midnight on August 14–15, 1947.

To celebrate the spirit of Independent India, an inter-class English declamation contest was organised for Classes 4 and 5, wherein the students showcased their oratory skills on the given topics. The participation of students was overwhelming.

Topics for Class- 4

1. Rich and Diverse Indian Culture

2.Clean and Green India

3. Unity in Diversity-India

4. Being a Responsible Citizen

Topics for Class- 5

1.Indian Constitution- Our Rights and Duties

2.Incredible India - The land of festivals

3.India in 21st century

4. Sports Legacy in India

JOY OF GIVING

The school's guiding motto, 'Confident, Competent and Caring', encourages children to be confident in their demeanour, competent in skills, have the morals to care for people and nurture a will to give back to the society.

"There is more Joy in giving than in receiving."

The above quote came to life as we celebrated the Joy of Giving month with an overwhelming response and enthusiastic participation by the students and parents. Our children wholeheartedly donated books, stationery items, toiletries,toys and clothes to the underprivileged students for the noble cause of uplifting the vulnerable section of the society. The drive was held in collaboration with Aashray, an NGO that works to promote social inclusion so that the underprivileged can be empowered to effectively participate in the mainstream development of the country.

Mr Shane W. Bakshi, the Managing Director of the NGO, thanked the school and felicitated the Principal, Poonamjit Kaur with a certificate of gratitude for the school's participation.

We are thankful to our parents for their generosity and being partners in this worthy cause.

PAPIER MACHE ACTIVITY

Papier mâché is a popular crafting technique that is used to describe objects of moulding material consisting of mashed up paper with glue and other additives. The method is named after the French term for "chewed paper," which makes sense given the steps needed for any papier mâché project. This used to be an important method of creating inexpensive objects, both useful and decorative.

Students of Class 5 were introduced to this beautiful art of recycling paper into beautiful objects through a workshop by Pidilite. More than 60 students participated in the workshop, which was conducted by Ms Shashi Guleria. She provided the children in-depth knowledge about this craft and helped them make various objects through a live demo.

"It is health that is real wealth and not pieces of gold and silver"~Mahatma Gandhi

Childhood is the most appropriate time to pick up healthy habits as then they can last a lifetime. A balanced diet is the key to healthy eating habits because it provides children with the nutrients they need for growth. Without balanced nutrition, one's body is prone to diseases, infections, fatigue, and low performance.

To inculcate healthy eating habits among students, an activity on balanced diet was conducted for Class 2 on August 5 where the children included different kinds of food items in their meal. The students spoke about the benefits of eating healthy food for the proper growth and development of body and mind. It was an interactive activity where the educators apprised the students of the benefits of nutritious food and urged them to follow a healthy lifestyle.

COLOUR MIXING ACTIVITY

"Colours are the smiles of nature"~Leigh Hunt

Mixing colours is one of the most classic art activities for kids. Creating new colours gives children a sense of accomplishment and they learn to identify them. Furthermore, it develops and strengthens their ability to communicate effectively as children use colours as a language tool to describe objects.

An interesting activity on colour mixing was enjoyed by the students of Class 1 during their English period, which also integrated the basics of art and EVS. Using the three primary colours: red, yellow and blue; they utilised a multitude of fine motor skills such as squeezing, pouring, mixing. They got hands-on learning experience with the primary and secondary colours, as well as tints and shades. It was a pleasure to see the happiness on the faces of the little Wonderites.

HAPPY RAINY SEASON

"Rain Makes Everything Beautiful"

It is the time of the year that kids enjoy the most as they get to splash around in rainwater puddles and make paper boats to float in the ponds.

The tiny tots of Kindergarten had fun and frolic as they made beautiful froggies in bright green and yellow colours with paper craft. All the children actively participated in the activity.

The educator shared facts about the rainy season and told them about all the important do's and don'ts that should be followed. It was a delight to behold the smiling faces as they proudly exhibited their colourful creations.

Aarvi UKG-A

Imparting life skills education to the students can be helpful as it specifically addresses the needs of children, motivates them and provides them practical, cognitive, emotional, social and self-management skills for life adjustments.

Children who have good knowledge of first aid are likely to be more alert and active. They make sure that they are not vulnerable to any accident or injuries.

Keeping the above things in mind, the students of Foundation Years made first-aid kits and learnt about the basics needed for dealing with any medical emergencies they may face in life. The students were informed about the correct use of antiseptic creams, Dettol, bandages, etc. and were told some easy home remedies for common illnesses.

The session was informative and highly beneficial for our young Wonderites and we hope that this knowledge will help them in their life.

FLIP BOOK ACTIVITY

There is no doubt that creativity is one of the most important skills provided to humans. Creativity is expressed through many ways including arts and crafts, which helps children develop fine motor skills, control, and coordination.

Keeping this in mind, an activity was conducted for the students of Class 1 who created vibrant flip books to showcase the different parts of a plant and their functions.

As the format of the flip book was intriguing, the students took interest in the activity and participated whole heartedly. They took the creation of the book to a new level and created flaps, with each page having its own fun surprise. The activity resulted in a highly organised study material and proved to be a fun way of learning.

"True friends are always together in spirit."

"Friendship Day is just an opportunity to let our friends know that we value their presence in our life."

To cherish the ties of friendship and precious bonds of togetherness between people, Friendship Day is celebrated all over the world on August 1.

To mark this day, an online celebration was organised for the Kindergarten students, wherein they talked about the importance of friends in life. They discussed the value of "sharing and caring" and put forth their views. The day concluded with the students wishing their friends and gifting friendship bands made of colourful pasta pieces.

COMMUNITY HELPERS

"Someone is sitting in the shade today because someone planted a tree a long time ago". ~ Warren Buffett

"You have two hands, one to help yourself, the second to help others." ~ Audrey Hepburn

Community helpers are the individuals who make our lives easier by providing goods and services. Some examples of community helpers are: doctors, nurses, teachers, lawyers, postmen, bus drivers, plumbers, firefighters, farmers, and many more.

To teach the students about their importance, a role-play activity on community helpers was organised for Class 1. Students spoke lines on one community helper of their choice and shared the contribution of different community helpers towards our society. Some of them dressed up and some also used props for the role play.

This way, the children realised the importance of different community helpers and the role played by them. The pupils also got a chance to talk about what they would like to be when they grow u. All the students showed interest in the activity and performed enthusiastically.

WHAT I WANT TO BE?

Goal setting is a powerful process for thinking about our ideal future and motivating our self to turn our vision into reality. Keeping this objective in mind, the students of Class 6 participated in a 'What I want to be?' activity held in the last week of July during the English class.

The enthusiastic students dressed up as doctors, teachers, singers, fashion designers, etc, and spoke about the profession that they wanted to adopt in their future.

The objective of this activity was to improve conversational skills and make the children realise the importance of setting future goals. The pupils looked adorable and made their teachers proud with their confidence and exuberance.

MATH MINECRAFT- COLLABORATION OF DECIMALS AND ART CLASS 6 ACTIVITY

Oswald Veblen has rightly said that mathematics is one of the essential emanations of the human spirit. It is the root of all forms of art and technology.

These days, children are more inclined towards online gaming and 'Minecraft' is one of them. The word 'Minecraft' is a portmanteau of two verbs: to mine and to craft. Based on this, an activity named 'Math Minecraft' was conducted to give the children an exposure on how the concept of decimals plays an important role in crafting different images. They not only created different images, but also found the fractional and decimal form of different parts of their respective images. The students participated enthusiastically and came up with innovative and interesting ideas. The activity was helpful as it made them realise the role of Mathematics in the development of technology as well as understand the concept of Decimals.

COMPOST ACTIVITY

More than half of what we carelessly throw into the trash is organic matter, which if composted properly, can produce rich topsoil for our plants. Unfortunately, most of us do not segregate our dry waste from wet waste, which makes compositing impossible. The precious waste –which can potentially turn into black gold-- remains unusable junk sitting in landfills. The key to a clean, garbage-free city lies in citizens doing their civic duty of source segregation and compositing.

Students of Class 6 created awareness about segregation of dry and wet waste among their family members and their near and dear ones as part of their summer holidays project. They created two separate dustbins for segregating dry and wet waste and practiced the compositing process at home using the kitchen waste.

Somebody has well said, "If you really want to do something, you will find a way. But if you don't, you will make excuses."

If anyone is willing to pave a path for themselves, they can even achieve the impossible task to complete their goal. Also, those who would prefer not to make a start in their life, they simply remain on the fence and make an excuse. Working hard for the future opens the doors for great opportunities. And those who are sitting inactive, for them it brings failure and distress.

If you want to do something, you will find a way Now not later! Never wait for the right time. You need to assemble your future by your own efforts! Life is too short to keep planning for it. Putting an effort and falling flat is always better than planning to do. A person who wants to learn something new can bear all the hindrances which surround him on a way to achieve something.

On the other side, an unplanned person will either make excuses or refuses to attempt. Now, we all should ignore our excuses and continue to settle on a right decision. A hardworking person will never wait for the right time but will wait for that right destination. Our main priority is to remove "But"....from our lives as it only put us down.

Obligation and positive attitude are the keys to reduce the need for excuses. Excuses postpone our work and result in lower efficiency and increased anxiety. So, do every undertaking byconfronting all the obstacles and never permit "excuses" to enter your area.

We, at SWS, believe that our students should take the ownership and lead their initiatives and projects. To implement this idea, children are provided opportunities to showcase their talent.

Our school stood First in an inter-school event 'Technokredible-2021', organised by Genesis Global School, Noida, on July 31, 2021. As many as 15 schools participated in the event and our Team comprising of three students, namely Madhav of Class 9, Yuvraj from Class 10 and Mentegh Bir Singh of Class 8 bagged the first position in the Treasure Hunt Event. It was a virtual tech-event which consisted of mathematics, science quiz and other tech competitions. Principal Ms. Poonamjit Kaur appreciated and congratulated the efforts of the children.

COPING WITH CHANGE WORKSHOP

An interactive session titled 'Coping with Change' was conducted by Ms Aanchal Sharma, Counseling Psychologist at Fortis Hospital, for the students and parents of Class 6 on July 31. She talked about the various changes one faces in life, from minor ones to the major ones brought by Covid-19 pandemic.

The session helped in preparing the pupils and parents mentally for the changes that they would face in life and acquainted them with the reasons of why these changes are disliked. The resource person familiarised them with the ways and means which would help them cope with the different situations of life and talked about various strategies and techniques that relieve stress. The parents and children put up their queries regarding mental health which were answered by Ms. Aanchal Sharma.
