## From the Principal's Desk

"The ability to read, write, and analyze; the confidence to stand up and demand justice and equality; the qualifications and connections to get your foot in the door and take your seat at the table – all of that starts with education." ~Michelle Obama

**W**ith another eventful month having gone by, I would like to extend my warm wishes to everyone as India celebrated a jubilant and historic 75<sup>th</sup> Independence Day. It reminds us of our cherished freedom and its sheer importance in our life, allowing us to grow both individually and as a nation. Our children are the future of our country and the onus lies on us to empower them with knowledge, understanding, life skills and relevant experiences. In order to prepare the children for the challenges that lie ahead, we at Smart Wonders School have a well-designed, holistic curriculum which includes a host of curricular and extra-curricular activities, thus nurturing them into confident, competent and caring citizens of the future.

Keeping in mind the need to delegate leadership and responsibility, we conducted the coveted Investiture Ceremony this month. For us, this occasion is not just about providing designations, but conferring responsibilities on the students, as they set out to take charge and scale greater heights. Qualities such as collaboration, cooperation and problem-solving skills, along with decision-making abilities, together, play a prominent role in achieving that vision. Platforms like these provide students with a lifelong opportunity of becoming assertive, dynamic and self-disciplined individuals. Moreover, the Students' Council at SWS is formed after a well-scrutinized selection process, whereby we take into consideration the overall past and present performance, as well as the future potential in our students.

As this occasion was attended by the parents of the selected students, it was a proud moment for all the stakeholders – the students, the parents as well as the staff. I, hereby, wish all the council members the very best for the tenure that lies ahead. May they achieve success in realizing each one of their goals, and set newer standards for the future members to follow suit.

I would also like to wish all the students good luck for the upcoming mid-term examinations. Such assessments develop students as an individual, instilling values and the ability to think above and beyond, and the strength to overcome failures and setbacks in life. So prepare well, believe in yourself and give your best shot!

Warm Regards,  
Poonamjit Kaur  
Principal, Smart Wonders School

# Investiture Ceremony

The investiture ceremony, marking the formation of a new 'Students' Council' for the academic session 2022-23, was solemnised with great zeal on 22<sup>nd</sup> August, 2022. A spirit of unity and dynamism filled the air as the grand ceremony commenced with a prayer to the Almighty. Principal Ms. Poonamjit Kaur; Vice-Principal Senior Wing, Ms. Raina Chona; and Junior Wing Head Ms. Sarika Sharma conferred the badges and sashes to the appointed Students Council members, enabling the young shoulders to wield responsibility by taking the oath of conscientiousness.. A mime was presented by the students of Class 9 and 10 to highlight the qualities of a good leader on the assignment of a new role. It was a proud moment for the parents of the newly elected cabinet members to witness their children being invested with great responsibilities while embarking on a new journey as leaders of our school's tomorrow.

## Rain Water Harvesting

With the intent to address the issue of water scarcity, the students of Class 5 created some functional and rather impressive models of rainwater harvesting systems. Needless to say, conserving rain water is one of the easiest and most effective ways to recharge and replenish our existing water resources. By means of their models, the students demonstrated the process of rainwater collection and storage. This water can, thus, be conveniently be used for multiple purposes washing, laundering, gardening, etc. Interestingly, the same can also be purified and made fit for human consumption.

## Show 'n' Tell

In today's day and age, the process of learning cannot be limited to textbooks and blackboards alone. Speaking activities allow children to collect their thoughts, express themselves better and be more creative while they are at it. They also help the students develop basic motor and cognitive skills. Keeping this in mind, a "Show 'n' Tell" activity was conducted for the students of Class 1. The topic was 'My Favourite Fruit', for which the students brought along some lovely, hand-made props. They spoke with great confidence, and definitely enjoyed speaking their heart out on this topic.

## Project on Great Artists

Studying art and subsequently, the life and work of great artists, allows us to identify similarities and, thus, make more sense of our own lives. Practicing art and pursuing one's passion helps us tap our creativity, build confidence and carve our own, individual identity in the process. It is also recognized as a driver towards innovative thinking, much needed to solve some of the most pressing problems surrounding our society. With the same intent, the students of Class 9 and 10 were asked to carry out some research and prepare a presentation on any artist of their choice, from around the world. It was lovely to see the students talk about who they chose, what they did and how they felt inspired by them.

# 3D Shapes

Another week of STEM club activities provided the perfect opportunity for encouraging our children to explore 3D shapes and their attributes through a hands-on activity. As instructed, the students brought the required material, including dough and toothpicks, from their homes, while the educators facilitated them in building their very own 3D structures. While performing this activity, the pupils exhibited immense curiosity, interest and effort. This activity was aimed at developing skills such as design and building, problem solving and spatial awareness.

# Janmashtami Celebration

A grand celebration was organised on Krishna Janmashtami by the students of the Foundation Years, Primary Years and Senior Wing. Students presented colourful assemblies and were dressed up in the attires adorned by Lord Krishna and Radha, thus adding a traditional touch to the celebrations. They recited beautiful poems and songs, filling the air with absolute joy and festive spirit. They also presented a skit on the birth of lord Krishna, and his mischievous little pranks. The students were quite mesmerized, and motivated to imbibe His teachings in their life.

## Compost-Making Activity

Taking a step towards protecting our environment by reducing garbage loads and recycling the kitchen waste, a compost-making activity was performed by the green warriors of the Eco Club. Students along with their teachers learnt the combination of dry and wet waste used for composting. They were explained that regular composting enriches the soil and helps retain its moisture, while addressing pest issues and plant diseases. It reduces the need for chemical fertilizers by encouraging production of beneficial bacteria and fungi that break down organic matter to create humus, a rich, nutrient-filled material.

Meanwhile, children were also introduced to the importance of sustainability by means of an interesting game. They were told that sustainability is the key to a better future. As humans rely on natural resources for survival, ignoring sustainability can lead to the exhaustion of natural resources.

# Activity on Spices

It is said that you learn better when you experience it. Proving this quote true, an interesting EVS activity was planned for the students of Class 4. We all know that taste is a very important sense due to its role in helping us determine the flavours of food and other substances. In fact, our ability to taste has historically been linked to our very survival, as our sense of taste gives us an indication of whether or not something is palatable. While studying the chapter of spices, students were given a real life experience of tasting 'Potato Chaat' and 'Fruit Salad', without adding spices, and then, after adding the spices. They were then asked to fill a template wherein they wrote feedback based on their reflections. It was a good vocabulary building activity too, wherein students learnt the names of the spices used in the kitchen.

## Women who broke the Stereotype

Gender stereotypes are preconceived, perhaps even patriarchal, notions set by the society whereby certain roles and traits are determined by and limited to the gender which a person belongs to. It poses a serious obstacle to achieving true gender equality, and feeds right into gender discrimination. Taking a step towards tackling this very issue, the students of Class 7 did a project on 'Women who broke the Stereotypes'. They came up with the stories of some rather interesting women who stepped out of their comfort zone, and walked the extra mile to break social stereotypes. It was overwhelming to see some students even talk about women from their own families, who they very proudly felt came under this category.

## छोटी इ की मात्रा गतिविधि

रचनात्मकता और तरीके, जिसके माध्यम से इसे व्यक्त किया जाता है, जैसे कि कला और शिल्प, बच्चों को बनाने के माध्यम से ठीक मोटर कौशल, नियंत्रण और समन्वय विकसित करने में मदद करते हैं। 'छोटी इ की मात्रा' की अवधारणा को ग्रेड १ में एक गतिविधि के माध्यम से पेश किया गया था। बच्चे गतिविधि के लिए आवश्यक सामग्री के साथ पूरी तरह से तैयार थे। उन्होंने एक स्ट्रॉ के साथ मात्रा का गठन किया और इसे ए-४ शीट पर चिपका दिया। विद्यार्थी इस गतिविधि के लिए बहुत उत्साही थे और स्वतंत्र रूप से उन्होंने सुंदर शिल्प का निर्माण किया | इस गतिविधि के माध्यम से उन्होंने अध्ययन सामग्री को व्यवस्थित करने का तरीका जाना | छात्रों ने इसका पूर्ण रूप से आनंद लिया।

## Inter-House Activities

Like every month, we conducted various Inter-House activities for the students this time as well, which provided them with platforms to hone their skills. Here are the results:

### Solo Singing Competition for Class 3:

S.NO	NAME OF THE STUDENT	CLASS	HOUSE	POSITION
1	Jaitegh	3B	Aspen	1 <sup>st</sup>
2	Aastha Sood	3A	Cedar	
3	Namandeep	3C	Maple	2 <sup>nd</sup>
4	Riddhi Dhiman	3C	Oak	3 <sup>rd</sup>
5	Shaurya Singh	3C	Cedar	Consolation
6	Gurfateh Singh Khattar	3A	Cedar	Consolation

### Solo Dance Competition For Class 4:

S.NO	NAME OF THE STUDENT	CLASS	HOUSE	POSITION
1	Vriddhi Jindal	4B	Oak	1 <sup>st</sup>
	Inayra	4B	Maple	
2	Kabir Kainth	4B	Maple	2 <sup>nd</sup>
3	Simranjeet Kaur	4C	Maple	3 <sup>rd</sup>
	Charvi	4D	Aspen	
4	Nimrat Kaur	4D	Maple	Consolation
	Ishpreet	4A	Oak	
	Ajooni Singh	4C	Oak	

### Declamation Contest for Class 5:

S.NO	NAME OF THE STUDENT	CLASS	HOUSE	POSITION
1	Aarnav Chauhan	5A	Maple	1 <sup>st</sup>
2	Divyakshi Gupta	5C	Oak	1 <sup>st</sup>
3	Saanvi Pathak	5B	Maple	2 <sup>nd</sup>
4	Tavleen Kaur	5A	Oak	2 <sup>nd</sup>
5	Bhavika Sharma	5B	Aspen	3 <sup>rd</sup>
6	Aarav Thakur	5C	Maple	3 <sup>rd</sup>

## Molten Magma Movement Experiment

Planet Earth remains one of the most complicated and mysterious structures mankind has come across to date. It is always interesting to learn about the mechanism that makes the earth go round. This rather fascinating topic is way too vast to be taught by means of textbooks. As a part of this experiment, students were made to understand better the concept of 'The Movement of Molten Magma', as they gasped in wonder and took several notes while they were at it.

# Friendship Day

Childhood friends have a special place in our life that just can't be replaced. In tune with the spirit of the occasion, people dedicate 'Friendship Day' to their best friend. The students of class UKG - A presented an assembly on 'Friendship Day'. Students discussed the value of 'sharing is caring', as they learned the importance of true friends in their life. They were thrilled to participate whole-heartedly in the assembly. To add a little more meaning and fun to the celebration, a group song and dance was also presented by the students. The day concluded with the little ones giving big, bear hugs to their friends. The assembly helped them gain confidence, build vocabulary and improve their public speaking skills.

## Independence Day

The 75th Independence Day was celebrated with great patriotic fervour and gusto at SWS by both - Junior and Senior Wings. The school was beautifully decorated with tricolor buntings and balloons. Special assemblies were conducted which started with prayers and were followed by recitation of patriotic songs by the school choir. Teachers and students even volunteered to sing patriotic poems and songs, thus arousing strong emotions for the nation in the audience. Some students delivered speeches, some recited patriotic poems and some presented dance. The tiny tots made the occasion a memorable one by dressing in tricolor clothes. The significance of India's independence was explained through a video.

Students of Class 8A showcased the journey and bringing about of our Tricolour, the symbol of pride for every Indian. To have a sense of pride in our national flag and creating awareness about the various stages of the development of our national flag was the main aim of this presentation.

Council Members and the students of Sewa Club rallied around the school to promote the 'Har Ghar Tiranga' campaign. They distributed flags among the people, raised slogans and also took part in a cleanliness campaign by picking up trash lying on the roadside. Our Principal, Ms. Poonamjit Kaur, encouraged students to appreciate and cherish our coveted freedom, and work passionately towards building a progressive nation.

## Class 2 Projects

The educators of Class 2 carried out some interesting and recreational activities for the little Wonderites to help them explore their creativity. Children were given different tasks for different subjects, such as making land and water animals using waste material, creating sceneries using different geometrical shapes, and a book review of something which they read during their vacations. Students came up with some wonderful ideas, and it was a sheer delight to see how well they performed in each one of these tasks.

Class 2

Class 2D

## Bagless Days

Giving students an opportunity to think beyond textbooks, CBSE introduced 'Bagless Days' to give a hands-on experience to the learners, and add the element of fun in the otherwise monotonous teaching-learning process. Students took part in various multimedia presentations, lab experiments and out-door activities, and presented their self reflections on different learning modules during the 'bag-less' days. Children merrily made it to the school carrying just their lunch box, water bottle, pencil box and their respective almanacs.

Students of Class 6 revised the chapter of 'Fractions' and, those of Class 7, revised the chapter of 'Exponents & Powers' by means of a quiz. The Class was divided into teams and the quiz helped them in checking their level of understanding. An activity was also conducted in Class 7 on 'Integers' using flash cards of different colours with red colour signifying 'negative integers' and green colour signifying 'positive integers'. The concept of addition and subtraction of integers was also recapitulated with the same.

## Symmetry in Nature

If an object is symmetrical, it means that all its opposite sides are of the same size. Symmetry can be defined for both regular and irregular shapes. To give an insight into the environment and find symmetry in nature, a nature walk was conducted for the students of Class 4. They worked in groups, and each group was to collect five different types of leaves. They pasted the leaves on an A4 sheet, observed the pattern on the leaves and drew the line of symmetry on the leaves. Through this activity, the students were able to differentiate between three major types of symmetries - horizontal, vertical and diagonal.

## Discipline

Discipline is indispensable for the existence of a civilized society. It is a quality that helps shape one's personality, and provide certain stability in life. Keeping that in mind, a workshop was organised for the students of Class 5.

The intensely interactive workshop was conducted by the school counselor, Ms. Mandeep Nijher. The sole objective was to help the students develop and maintain self-control, have respect for others and imbibe socially acceptable behaviour.

With an aim to allow the little ones dream big, take charge and turn those dreams into reality, the students were informed about the importance of 'self discipline'. Simple tips and strategies were also discussed, which would allow them to imbibe this quality in their daily life.

## Ordinal Numbers

It is rightly said that 95% of what a child learns is through direct experience. To make it easier for them to understand the concept of Ordinal Numbers, an interesting activity was conducted for the students of Class 1. The students were asked to arrange ten odd paper cups in a pattern of their choice, and speak out their respective ordinal numbers. All the students were excited about the activity, and enthusiastically arranged their paper cups in pyramid, queue or a zig-zag formation. This activity went a long way in making them understand the concept and sheer importance of Ordinal Numbers in their daily life.

## Warli Painting

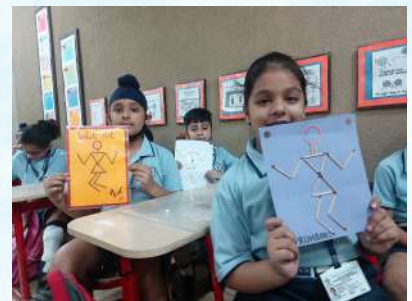

Students of Grade 3 made beautiful pieces demonstrating Warli art with the help of matchsticks. This art is two dimensional, with no set perspective or proportion as such. It is simple by-and-large linear, with maximum use of triangular shapes wherein the upward facing triangle represents 'male', and the downward facing triangle represents 'female'. By means of this activity, the educators integrated Mathematics with this art. The children were excited to share their creative work with their friends, and the same was even displayed in their respective classrooms.

## Students' Corner

Let the bird out of the cage,  
She's weeping and crying,  
Think kindly, turn the page,  
Look, she's crying and dying...

She wants to sing,  
She wants to fly,  
She wants to spread her wing,  
But you make her die...

She wants to see the world,  
She wants to reach the horizon,  
She doesn't want to be curled,  
Rather, she wants to have fun...

She is our pride,  
Don't make sit aside  
She wants to go for a ride  
She wants to see the world wide

Aren't we all free?  
If yes, then  
Why can't she be?

# Our Proud Achievers

1. Our students brought laurels in various categories during "India Calling", a pan-India inter-school event held at Manav Rachna International School, Mohali, on August 24<sup>th</sup>, 2022. We are proud to share the names of the winners.

In Photography and Videography Competition, Vedant Thakur and Jaskaran Singh bagged the coveted First prize.

In Group Singing Competition for Class 1, Shreya Sharma, Amoli Sharma, Nimakhpreet Kaur and Jouharvir secured Third position.

In Group Dance Competition for Classes 2 and 3, Bhaavi, Nimrat Kaur, Harliv, Aastha Sood and Taesha Narang finished Third.

2. Natik Goel of Class 9B was awarded a Letter of Appreciation for his consistent participation in various social welfare projects, organised by LEO Club, Chandigarh Fortune, in association with Chandigarh Administration.

Vedant Thakur and Jaskaran Singh, winners of Photography and Videography Competition held at Manav Rachna International School.

Shreya Sharma, Nimakhpreet Kaur, Amoli Sharma and Jouharvir secured the 3<sup>rd</sup> position in Group Singing Competition.

Harliv, Bhaavi, Taesha Narang, Aastha Sood and Nimrat Kaur bagged the 3<sup>rd</sup> prize in Group Dance Competition.

Vagisha Sharma of Class 7 participated in the Technominds Inter-School Event held at Shemrock School, Mohali

Rehatpal Singh, Harshaad Singh Sagoo and Kartik Kalucha took part in Art Masters held at Manav Rachna International School

Bhavik Goel, Class 7C, cycled from Phase 7 to Siswan Dam covering 48kms

Naitik Goel was awarded a Certificate of Appreciation for being the Youngest Cyclist at 'Chandigarh Pattern Cyclothon'

Harshita Sharma and Ridhi Chopra of Class 8 took part in 'Just A Minute' held at Manav Rachna International School
