

Nurturing Young Minds to Navigate the Future with
21st CENTURY SKILLS

“Give me a fish and feed me for a day. Teach me how to fish and feed me for a lifetime.” This ancient Chinese proverb aptly summarises the true essence of the National Education Policy 2020. By highlighting the critical role of 21st Century Skills, the NEP envisions a holistic education; one that extends beyond textbooks and instills key skills in students such as innovation, collaboration, self-direction, social responsibility and adaptability that are vital for being successful in life.

This academic session, we endeavour to equip each learner at SWS with the 21st Century Skills for a positive transformation and face the challenges of an evolving world that is changing at an exponential rate. As we integrate these skills into our curriculum, we empower our students to become Confident, Competent and Caring individuals, who are not only capable of taking charge of their own academic journey, but also making meaningful contributions to the society at large.
